MICHEL
HERBELIN

ATELIER D'HORLOGERIE FRANÇAISE

CATALOGUE 2021

The brand's history

For more than 70 years, our French watchmaking studio is constantly evolving.

We invite you to discover the new models of our iconic Newport collection, totally revamped and highlighted by 3 Automatic Limited Edition. Its legendary and unique style, was inspired by the portholes of the transatlantic ships, a tribute to the passion of the Herbelin family for sailing.

Our Newport ambassadors Xavier Pincemin (French chef) and Guillaume Guerbois (world champion of mixology) continue to share important values for Michel HERBELIN such as: Independence, passion, transmission, quality and know-how.

New ambassadors joined the Herbelin team to give a new impulse to the Antarès collection: Emilie Grison and Sophie Dorn, two influencers who perfectly fit with French women style. To emphasize this partnership, we reveal a new watch case set with hat will captivate fans of exquisite elegance. Sparkling and inspiring, these ambassadors reflect perfectly the antarès style, with a large variety of colours and materials, in single or wrap around straps.

MICHEL HERBELIN, A MAN IN MOTION

The story began in the cradle of French watchmaking, in Charquemont, a village nestled in the heart of the Jura mountain range. Michel HERBELIN's parents had intended for their son to take over the family business, but he could only dream of precision mechanics. Against his parents' wishes, he began to study watchmaking.

After spending several years in a local watch factory, whose products did not live up to his high quality standards, and fuelled by the ambition to restore traditional French watchmaking to its former glory, he took the bold step of starting a new venture... his venture.

Michel HERBELIN opened his own studio on the top floor of his parents' house in Charquemont and began to create his first watches at the age of 26.

STANDARDS IN MOTION

It was not by chance that Michel HERBELIN named his first watch "IMPEC" in 1947. He clearly wanted to communicate his dreams and ambitions: to create elegant watches that worked perfectly - "impeccable" watches. He relied on French and Swiss suppliers based in the Charquemont area to give his customers flawless watches.

In 1965, given the success of his collections, he decided to create his eponymous brand. IMPEC became Michel HERBELIN.

IN PERPETUAL MOTION SINCE 1947

The brand has managed to make it through 70 years all by staying faithful to its original values. All of its watches are designed, assembled by hand and inspected in the brand's Franche-Comté workshops and promote the same philosophy : the creation of timepieces that are designed to last, all the while respecting artisanal know-how and adding a touch of French elegance. At Baselworld 2017, Michel Herbelin entered the digital era with the Newport Connect. At Baselworld 2018, the new generation of Newport watches made its appearance, with a style that is more modern and discreet, but one that continues to be marked by the brand's DNA.

PERPETUATING THE MOTION

Bringing passion to time was Michel's profession for over 40 years. It was therefore only natural that he passed on his passion for watchmaking to his two sons Jean-Claude and Pierre-Michel, who joined him in his venture. It was at this time that quartz first made an appearance. While some saw this as a sign that French watchmaking would weaken, Michel HERBELIN and his sons viewed it as an amazing opportunity to unleash the creativity of their designers and to take on the challenges of the future. The passing down of know-how is an essential value at Michel HERBELIN. Today, three of the founder's grandchildren now ensure the success of the family business. Their creativity and expertise has given the brand new momentum.

The brand's know-how

A MICHEL HERBELIN WATCH - TEN KEY CHAPTERS, ONE DESIRE : CREATE TO LAST

- CHAPTER 1 : INSPIRATION

... Behind every creation, there is inspiration and imagination, a knowing blend of architecture and fashion. Freehand drawings around a table, papers that are rubbed out, crumpled up and scribbled on. Doubts, convictions and anecdotes. Intuitive visions, ideas gleaned from Michel the founder's archives...

- CHAPTER 2 : CREATION

Once the designer has defined the scope of their inspiration, they must find the creative idea that best expresses that territory. This idea can be expressed in words, or it can take the form of a concrete freehand drawing.

- CHAPTER 3 : DESIGN

The designer must study the smallest details, define the proportions and give an idea of the volume, colours and materials. The watch begins to come to life.

- CHAPTER 4 : THE TECHNICAL DRAWING

The calibre-designer, the true architect of the watch, produces the technical drawings while faithfully following the specifications.

- CHAPTER 5 : THE PROTOTYPE

The artisan watchmaker first inspects then assembles the components by hand to build the prototype of the new model. It will then be modified several times to meet the aesthetic and technical criteria defined by the designers. Only when the prototype is deemed to be impeccable can production be launched.

- CHAPTER 6 : ADJUSTMENT AND INSPECTION

Before assembling and starting the watch, each component is painstakingly inspected and adjusted to ensure that they work perfectly.

- CHAPTER 7 : ASSEMBLY AND STARTING THE WATCH

At every moment - from placing the dial on the movement to casing-up and hand-fitting - each watch is painstakingly inspected to ensure perfect operation. The watch is started and comes to life - a magical moment.

- CHAPTER 8 : CHECKING THE WATER-RESISTANCE

Each watch is individually tested. The tests are carried out under pressurised and depressurised conditions, for values that correspond to depths of 30 to 1000 metres.

- CHAPTER 9 : ATTACHING THE STRAP

This is the final touch, the moment when the watch really comes into its own. Leather, metal, beads : to each watch its own style and personality.

- CHAPTER 10 : OPERATIONAL TESTS

Every watch is examined by the expert hands and watchful eyes of the artisan watchmakers of the production workshop to check its technical and aesthetic characteristics. Nothing is left to chance.

REGATTA

A helpful crew member for any regatta, this Newport chronograph boasts a complication to count down the time remaining before the start of a race. Known as the countdown function, it appears in the minutes counter at 3 o'clock, which is slightly enlarged for optimal visibility.

Made for racing, this tri-compax chronograph can record elapsed times up to 12 hours. It features a tachymeter scale that runs from 60 to 400 km/h in graduated red at the top of the dial, allowing dedicated record breakers to measure their average speed over a given distance. Water-resistant to 100 metres, the watch is paired with an extremely tough FKM rubber strap.

NAUTICAL STYLE – Presenting a 43.5 mm steel case – polished and brushed to accentuate its three-faceted cut – this new Michel Herbelin chronograph is inspired by the streamlined architecture of stealth ships.

MOVEMENT – With a new Swiss-made Sellita SW510 automatic mechanical movement on board, oscillating at 28,800 vibrations per hour and incorporating 25 jewels, this timepiece offers a 42-hour power reserve. The transparent caseback reveals an oscillating mass engraved “Michel Herbelin” and decorated with a Côtes de Genève pattern, proffering a glimpse of the circular-grained bridges and frame.

NAUTICAL STYLE

Michel Herbelin new-generation Newport is a sleek design update of the instantly recognisable codes that made this iconic collection such a success: the strap's central lugs, the porthole-style bezel, and the ship's wheel stamped on the crown.

Presenting a stainless steel case – polished and brushed to accentuate its three-faceted cut – this new Michel Herbelin is inspired by the streamlined architecture of stealth ships.

Beneath a bezel punctuated by five screws modelled on yacht winches, the various dials in the collections spotlights the model's seafaring spirit.

The strength of design ensures Newport is the iconic collection of Michel HERBELIN

ANTARÈS

EXCEPTION & CRÉATIVITÉ

come together in the Antarès watch, an iconic model with interchangeable straps, crafted with precision in France at our workshops in Charquemont.

Featuring a patented system to change straps, available in leather or metal, the subtle luxury of the design lends itself to all variations of style.

Born to challenge the ephemeral, the ANTARES collection embodies the ongoing pursuit of aesthetic and technical perfection that drives the family-owned Maison Michel Herbelin.

ANTARÈS

This collection is a true fashion accessory, as it offers the possibility of adapting the watch to the lady's own style in just one click, thanks to its patented change strap system
